

## Coach to Catcher Wireless

### No Headset Cables

*Porta Phone EVADE are totally wireless Coach to Player intercoms that set a new standard in athletic communication.*

All Evade intercoms include E-PAK full duplex transceivers and wireless headsets totally eliminating wires. This *provides freedom of movement* leaving coaches and players alike unencumbered by headset cables. Standard mobile phone accessories will connect with E-PAK so that players can even use their own personal wireless headsets or earbuds.

The E-PAK are manufactured in two versions; *full duplex* so that coaches can talk to each other simultaneously, and *“one way”* so that players can just listen only. With an unlimited number of monitor users and an operating range up to 400 yards Porta Phone EVADE can easily link a coaching staff with athletes on practice fields or live game venues.

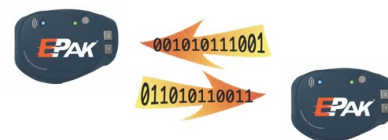

### No Cables For Coach

- Connect wirelessly to E-Pak
- No headset wire

### Coaches in Full Duplex

- Two-way communication, open line

### Coach to Player

- One way only
